Chapter 6. Descriptive Statistics (Part 2)

February 17, 2022

6.4 Box plot

The **box plot** is a graphical display that simultaneously describes several important features of a data set, such as center, spread, departure from symmetry, and identification of unusual observations or outliers.

Example

Given a data of ages of 14 random adults from a village

15, 20, 31, 31, 32, 40, 41,
41, 42, 43, 45, 45, 50, 70

Draw a box plot for this data.

| | |
|---------|----|
| Median | 41 |
| Q1 | 31 |
| Q3 | 45 |
| IQR | 14 |
| Outlier | 70 |

6.5 Times sequence plots

A **time series plot** is a graph in which the vertical axis denotes the observed value of the variable (say, x) and the horizontal axis denotes the time (which could be minutes, days, years, etc.)

Years Annual salary

2005 20614

2006 21175

2007 24766

2008 28100

2009 30189

2010 24618

2011 22006

2012 30912

2013 32523

2014 35285
